WIRELESS!

This is a new system of telegraphing without a connection between the stations by wires. Have you heard about it? Do you believe that this can be done? If not, it is to your interest to investigate it. Remember that there has been wonderful things done in the scientific world within the past few years. A certain number of people have always said it can't be done, and with that assurance in their minds, have allowed great opportunities to pass by, and felt very foolish later, that they did not investigate at the time, as stocks bought in the promotion days of the great inventions, have, almost without exception made fortunes for the holders. Only a few of these cases are, Bell Telephone, the commercial success of which was laughed at by apparently wise people, the Westinghouse Air Brake, which was ridiculed by the great Vanderbilt, the Morse system of telegraphy that had a very hard time selling enough of its stock to put up an experimental line, the Electric Light and numerous other great and grand achievements, all of which had a hard struggle in getting started, yet have made fortunes for the ones who were wise enough to assist in the promotion, by buying a little of their stock.

Wireless telegraphy may be very mysterious to the reader, but like all others it has its scientific principle, which upon investigation, is easily understood. The best proof, however, is that we are doing it. Over land and sea, the DeForest Wireless Telegraph Company have their stations established, and are daily transacting successful commercial business, of which we have abundant proof. If you will think what the telegraph business of the world means, and then carefully consider the results of saving 95 per cent of the cost, you must admit that it is the greatest money earning power in the world. Let us send you by mail, testimonials and statements in proof of the success of wireless telegraph from the most reliable authority in the country. Let our agent when he calls at your town, interview you. Get some of our stock in the original parent company and enjoy your share of the great profits to be derived from the future operation of wireless.
